

PRIMAVERA

Importação e Exportação de Cereais Ltda.

Lisbon, 19.2.2013

Dear Sirs,

This is a brief introduction to our company Primavera, Importação e Exportação de Cereais Ltda. We prefer just to be called Primavera.

We are a Brazilian food producer with origins back to 1950. The company is the owner of 350,000 hectares of land principally in the Brazilian state of Tocantins but also in the states of Bahia and Maranhão.

Soybeans are our major crop, but we also produce other crops such as yellow corn. We grow GMO, NON GMO and even organic varieties of crops. Furthermore, we deliver processed products from our crops such as soybeans meal and soymilk.

Our potential production capacity of soybeans is 1,000,000 metric tons a year. We can increase this production capacity by using a network of over 30 other producers all organized under Primavera.

Please have a look at our website if you are interested in more information. On www.primaveracrops.com we have described our company, our products and contacts in more detail.

To get an idea of our business we would like to invite you to come and see our land, the state of Tocantins, the capital of Tocantins, Palmas, and of course to have meetings with us.

We thank you for your interest and please do not hesitate to contact us, if you have any questions or issues we may help you with.

Yours Sincerely,

Pierre A. Larsen
Commercial Director
